

XR Guru Installation Guide for **Mac**

System Requirements for MAC

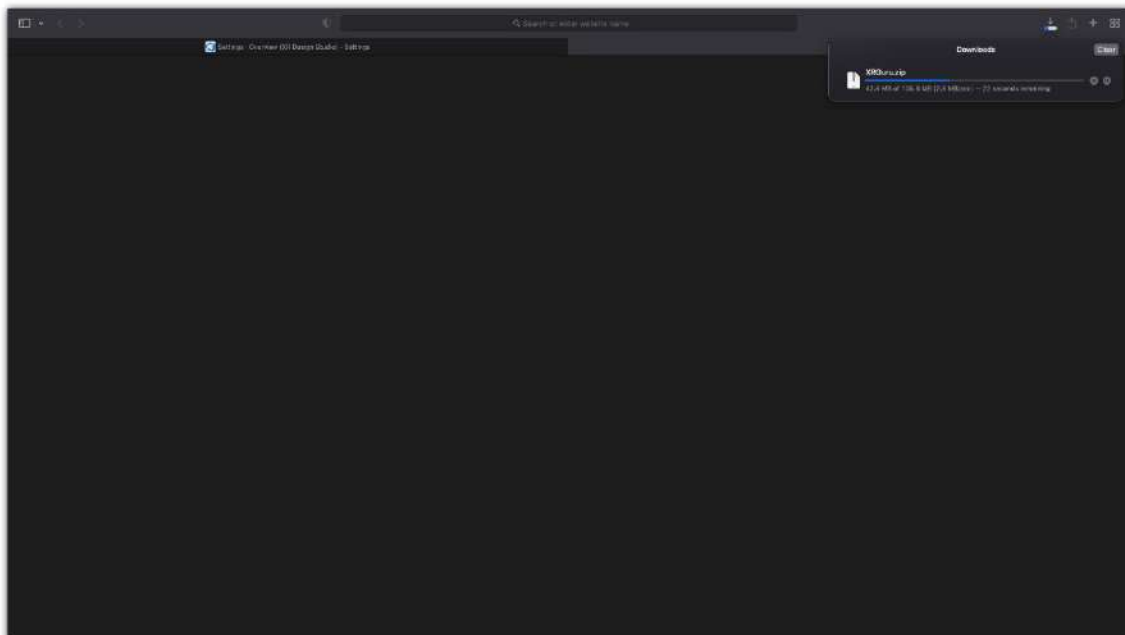

Operating System	Mac OS V10.15 or later
Display	1920 X 1080
RAM	4GB of RAM
Storage	In general, the topic content gets downloaded to the local device storage before it can be accessed. In addition to this to load the contents faster in future and to provide access to downloaded contents in offline mode the contents are being downloaded to the local device storage.
Internet	Internet connection is required for the app to work, except while accessing the downloaded topic content in offline mode.

How to run XR Guru on Mac?

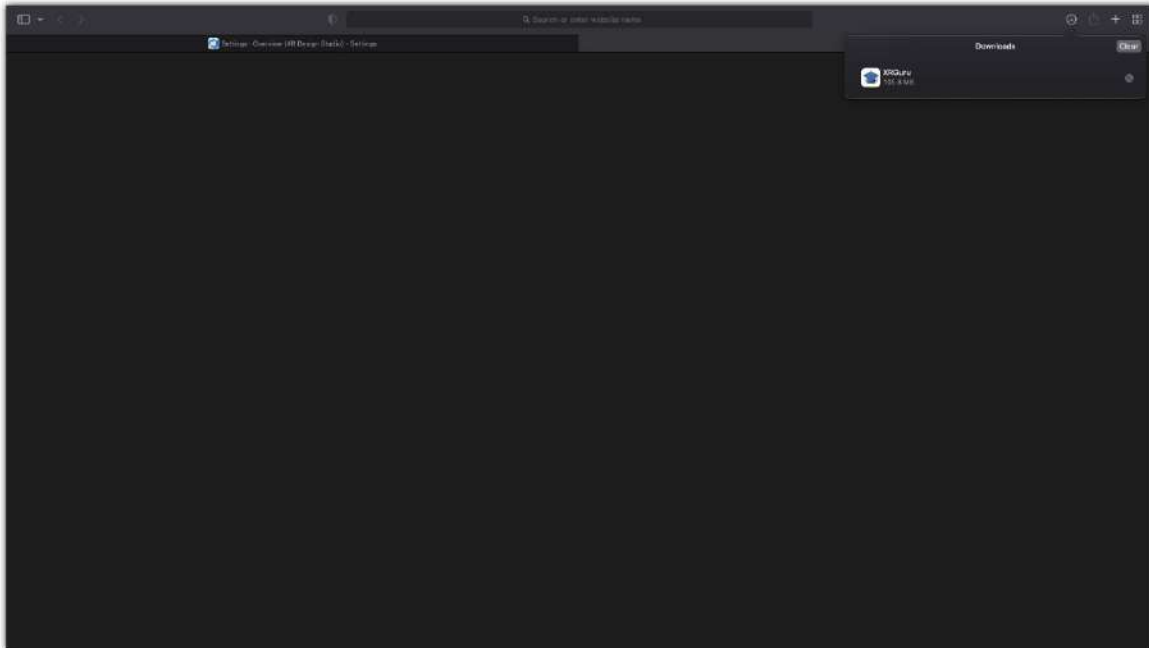

Step 1: Click the following “Download” button to begin downloading the file.

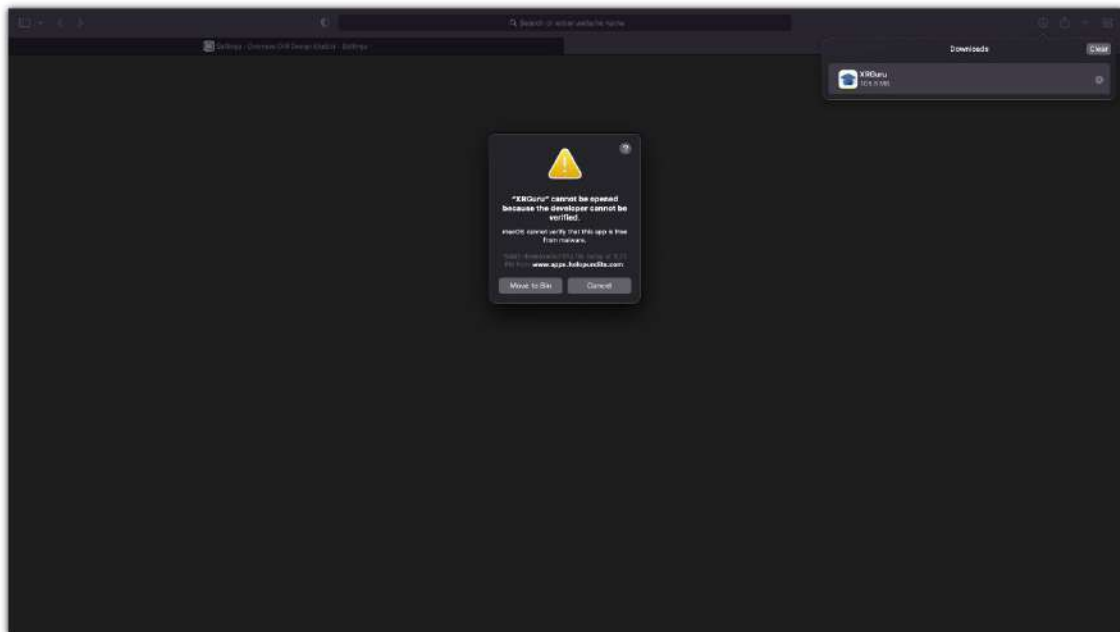

After clicking the button, the download will start. You can monitor the download progress.

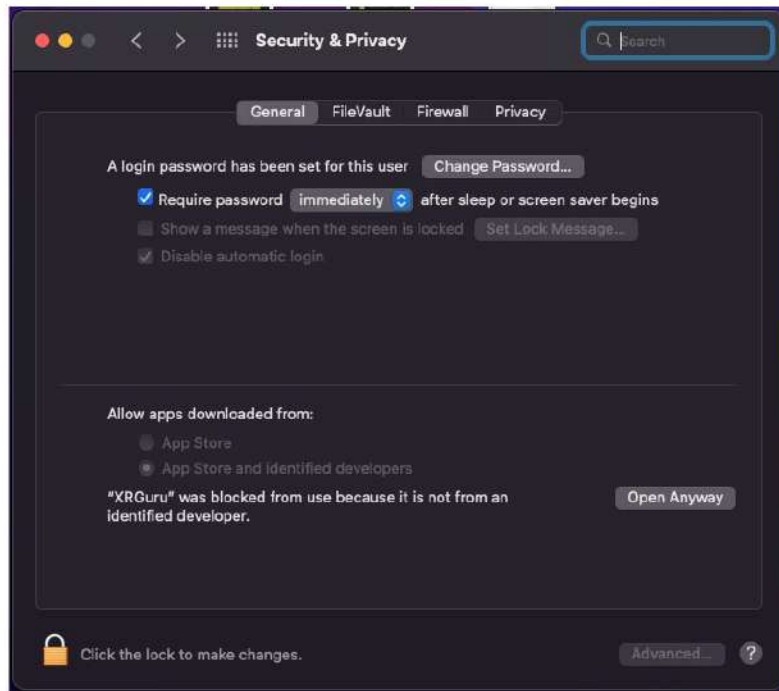

Step 2: Once the download is completed, click on the downloaded file to open it.

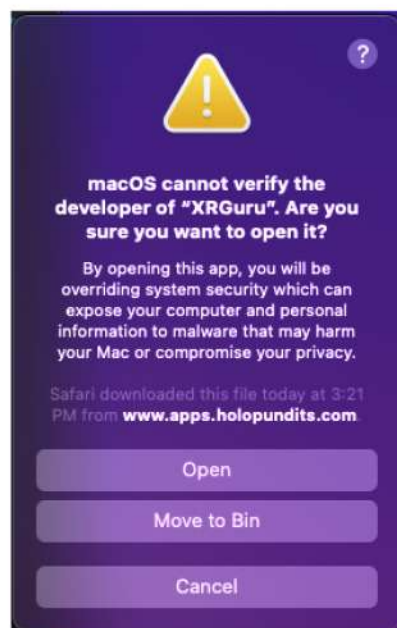

Step 3: When opening the file, you will receive the following message. This message will appear whenever you download an application from a downloadable URL outside the mac store.

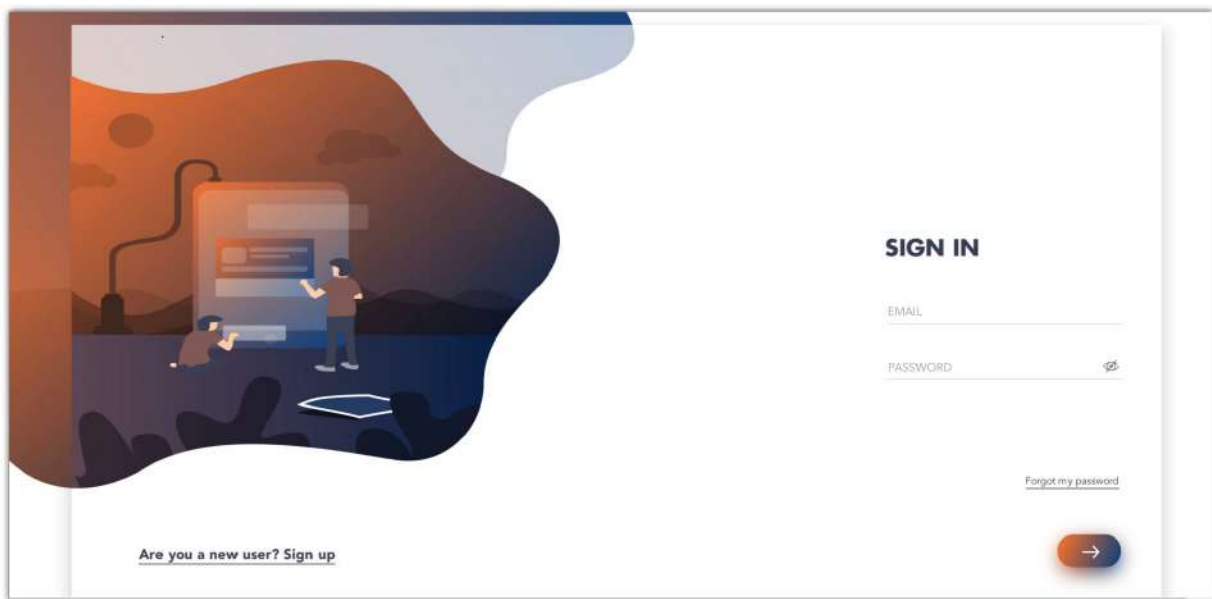

Step 4: Select and click on the “Open Anyway” button from the “Security and Privacy” settings to run the app.

Step 5: Confirm that you want to open the “XR Guru” app by clicking on the “Open” button.

Step 6: After clicking on the “Open” button, the start-up screen of the app will appear prompting you to either login or register.

Step 7: Enter your login credentials to get started or register as a new user.
